

FLORIBUNDA ROSE PLANT NAMED 'MEIANGELE'

Abstract of the Disclosure

A new and distinct variety of rose plant of the Floribunda Class is provided which forms attractive red blossoms commonly having at least one hundred petals that tend to be quartered around the receptacle. The growth habit is bushy. Very dense and leathery dark green glossy foliage is formed that contrasts nicely with the blossom coloration. Very good disease resistance is displayed especially with respect to Black Spot. The new variety is well suited for growing as attractive ornamentation in the landscape.
